
Training session "ICT in the implementation of scientific research"

On May 21, 2019, within the framework of the Festival of Science at Boris Grinchenko Kyiv University, the scientific society of students, postgraduates, doctoral students and young scientists of Pedagogical Institute held a training session **"ICT in the implementation of scientific research"** for students of the specialty "Primary Education".

The training aimed at familiarizing students with various online platforms for the implementation of scientific research. Participants were given the opportunity to choose the most relevant online platforms that are appropriate to use during training and research activities.

Students were invited to consider the functions of Google services and online applications, which should be implemented in further work with scientific texts.

***The moderators of the event:** Svitlana Palamar, deputy director on scientific work of Pedagogical Institute; Yana Matiushynets, head of the Scientific Society of Students, Postgraduates, Doctoral Students and Young Scientists of Pedagogical Institute; Kristina Kabanova, deputy head of the Scientific Society of Students, Postgraduates, Doctoral Students and Young Scientists of Pedagogical Institute*
