## Outside classes on "Human Studies" at the National Museum of Medicine of Ukraine

On October 16-17, 2019, the first year students of specialties "Preschool education" and "Primary education" visited the National Museum of Medicine of Ukraine. During the tour, which took place in the framework of the study of the discipline "Human Studies", students plunged into the history of medicine, got acquainted with the biography of prominent figures in the field of medicine of Ukraine and their contribution to the study of human anatomy.

The visit to the Museum aimed at preparing for the implementation of independent works on "Properties of a man as an individual" and "Paramedical care in accidents and emergencies (algorithm of actions)»

Moderators: senior lecturer Melnyk I. S., and senior lecturer Moisak O. D.
