
"The organizational bases of the theatrical activities of preschool age children»

Training sessions at the University are different. For example, on February 13, 2019, there was an unusual class for groups ДОб-1-15-4.0д, ДОб-2-15-4.0д, ДОб-3-15-4.0д and two groups who are studying after college - ДОб-1-17-2.0д, ДОб-2-17-2.0д in "Methodology of introducing children with art" (content module "Organizational foundations of theatrical activities of children of preschool age"). It was organized by Polovina Olena and Kondratets Inna, teachers of the Department of Preschool Education in Kyiv Academic Theatre of Young Spectator on Lypky.

Students watched the play "Green Hills of the Ocean." The philosophical meaning of the theatre performance for children made us think about such concepts as friendship, dream, sincerity, support, team, and others. The result of the class will be reflected in the module work in the form of an art essay: "The educational potential of a theatre performance".
